

**THE ITALIAN JOB - TWO!**

**ITALY | EMILIA-ROMAGNA | 7-14 SEP 2019 | 8 DAYS**

“THE ITALIAN JOB - TWO” TOUR to Emilia-Romagna is the Action4Diabetics (A4D) fund raising cycle challenge for 2019. The aim is to raise US\$75,000+ for young people with Type 1 Diabetes in South East Asia. These funds will go directly towards keeping 125 young Type 1 Diabetics alive and well for another year.

The hills on the eastern side of the Apennines were a favourite stomping ground of Marco ‘the Pirate’ Pantani, much loved Italian cyclist who was considered one of the best climbers of the 1990’s. We follow roads used by the Pirate and the Giro d’Italia. This is an “entrée” for the peloton as it makes its way north to the Dolomites, through Emilia-Romagna.

The tour begins in the beautiful hills around the thermal spa village of Bagno di Romagna. From Bagno we head towards the coast, visiting historically fascinating towns such as San Leo and the fifth smallest country in the world, San Marino. Tuscany and the Veneto are neighbours, and the food reflects the best of Tuscan and Venetian cooking, with the freshest seafood at hand. Emilia-Romagna is home to signature Italian products such as Parma ham and parmesan cheese.

This region provides sensational riding. The terrain is hilly, with short, sometimes steep climbs great for bite-sized challenges as well as flatter, coastal riding with the sparkling Adriatic to the east. This year’s A4D Tour has been specifically designed for riders of all abilities, with short and long route options on daily routes. Every rider can enjoy a unique opportunity to challenge themselves, and raise funds for young people with Type 1 Diabetes in the poorest parts of SE Asia.

After lunch, bike fit for those who have hired bikes, and assistance with assembly of bikes for those who have brought their own. ### DAY 2 SUN 8 SEP | LOOP TO PASSO FUMAIOLO

A great ride to get into your rhythm ready for the challenges ahead. Today's ride starts with a downhill and gradual 21.5km climb to Passo Fumaiolo. Used in the Giro d'Italia as recently as 2017, this steady climb winds through thickly wooded slopes on quiet roads. Ascend one side, or tick off both! The long course offers the chance to climb the steeper side of Passo Fumaiolo!

### DAY 3 MON 9 SEP | LOOP TO PASSO MANDRIOLI

Another Giro d'Italia ascent today, as we head out on a loop to Passo Mandriolo. This is a shorter climb, only 12km, but the average gradient is higher. Remember, longer day tomorrow.

We recommend that flights home are scheduled for mid-afternoon onwards.

Time to say farewell, until next time!
